EXPERIENCES

Currency pairs

EURAUD

Price overall on the higher timeframe was bearish, it tapped into a bearish weekly imbalance and it needed to mitigate a bullish orderblock. This trade was a total of 90pips

Currency pairs

AUDUSD

I traded this pair during the London trading sessions, I anticipated the daily candle to be a down close to take a short. I made about roughly 20k dollars on that trade

PROFILE

I am a meticulous Forex trader with an adept knowledge of the foreign exchange Market and the skills to trade it. I trade on ICT concept, London and New York session. My favorite pair which I need little to no effort in analyzing is the EUR/USD PAIR.
